

## **Accountability**

We have limited funds and until such time that there are more National Assistance programs, the steps outlined here are necessary so that the Subud Emergency Fund team, which is far removed from the situation and has limited knowledge or experience of local circumstances and services, can better understand the needs and typical costs.

We have an obligation and desire to be responsive and caring; yet we also need to be prudent and transparent. While the vast majority of applications are completed honestly and are for genuine needs, some members have misrepresented their needs.
