

## **2014 WORLD CONGRESS PROPOSALS FROM FRANCE**

### **1. STRENGTHENING THE ORGANIZATION AND WINGS:**

- We think it would be a good thing to have a zonal coordinator for each wing: youth already exists, but also culture, enterprises, welfare.

- To encourage regional meetings whether kejiwaan, wing activity oriented or general at regional and national levels and within the zone and interzonal.

### **2. TALENTS, PROJECTS:**

Joseph Delcourt submitted an excellent project that can be developed, using Google map to identify Subud members wherever they are located, group or isolated, on a map of the country that can be extended to the zone and the world.

The more you zoom on the map, the closer you get and the more dots you see giving the information of the presence of Subud members.

### **3. SUBUD'S PRESENCE IN THE WORLD:**

- We are very conscious that we have a role to play to support the emerging countries and groups in Africa. We should support International Helpers Travels but we, ourselves, may help in an area or two. Help for the women, openings, micro-credit enterprises. And share the reports that are made upon each visit by the international helpers.

- Texts and Subud literature in general should be written in a more accessible manner, respecting the different cultures, ages and mentalities and do away with too many Indonesian and Javanese words and concepts especially in all the introductory material and explanations.

### **4. FINANCE AND MSF:**

We are in the process of finalizing our accounts in an official manner and for MSF, we are about to have a team of three persons for the liaison of MSF for France. Laws are not at all in favour of legacies to a foreign association. Ways must be found.

### **5. HELPERS' WORK:**

The concept of "helpers without borders" should be strengthened and started or at least encouraged and the process clearly defined.
