WSA archives proposed resolution for Congress 2010

The World Subud Association acknowledges that its archival resources form an essential part of the foundation of the WSA and is therefore committed to and acknowledges its responsibility to facilitate, manage and resource its archives for the long-term in a sustainable manner.

The World Subud Association further acknowledges the need to ensure the security backup system is sufficiently comprehensive to be able to re-establish in context, the most critical data, including WSA vital records, in the event of any global or localized catastrophe.
