

AFFILIATE / ACTIVITY REPORT

2011 World Subud Council Meeting AFFILIATE / ACTIVITY REPORT	
Name and Affiliate/Activity	SIHA
YOUR ROLE/WORK How do you see your role? What has been your main focus?	Chair Reawakening the SIHA organisation Determining Objectives and plan of actions Setting up a website that can be used as a communication and work platform.
PROJECTS/NETWORKING Please report on important developments or projects and any international networking.	There have been SIHA activities in the USA, UK and Australia... but we are still gathering information, so more details in a later report. We are still in the process of recreating connections amongst SIHA interested people around the world.
STRENGTHS/ WEAKNESSES What are the strengths and weaknesses of your affiliate/activity at this time?	<u>Strengths:</u> - High enthusiasm - Access to tools that will greatly help work collaboration <u>Weaknesses:</u> - Low finances - Lots of work still required for the reawakening of SIHA
COLLABORATION How do you see the possibilities for working with other affiliates/ activities? Or for better collaboration within the WSA?	A high priority is to create streams of revenue for supporting the growth of SIHA. So there will probably be links with SES. Due to the nature of SIHA, activities will be open to interact with SYA, SD and SICA. Providing support and collaboration with anything that is SIHA related.
COMMENTS Any other comments?	Little has happened over the last 2 years, but there is a strong revival going on. At this point in time the activities are more of a foundation nature and thus are not very visible just yet (Website / internal restructuring). During the WSC meeting more details will be presented on the plans and some of the activities that are being setup.

WSC MEETING

What would you like to see addressed at the 2011 WSC meeting?

1) SIHAs' official position/role within WSA.

2) More generally, some discussion on the use of modern technologies to make the work within Subud more effective : increasing flexibility/clarity and possibly reducing costs.

Lots of new international companies are using online work collaboration tools (eg. GoogleDocs / Skype / various webtools ...) to greatly improve the quality of their work and their reach, i would like to see more discussions on this within Subud.

Many tools have been developed and perfected over the last 5 years and Subud could greatly benefit from being open to these new tools.

SIHA is taking full advantage of what is available and it would be very helpful if some discussions happened on this. Working using similar tools will be helpful when interactions with WSA/WSC and the other wings.

In the business world there is a massive shift towards online technologies... One the one side, not keeping oneself informed on the latest available tools and on the other side, not requesting all players of team to use similar practices & tools, greatly influence overall effectiveness.
