So that we build a conceptual image based on the people from the zone, we start to build a conception of the zone.

Through the bulletin we will try to create an conceptual image of the zone, like space to get together. That have the same ideas for the perspective international of their countries and members, with the idea that we have a zonal identity and also their potentials, services and benefits that this structure bring for the Subud members in general.

Final Consideration:

After several tests, about the zone and their feelings, we had concluded that the idea of the zone, it is an act of love and generosity, that allow us touching spaces farther of our surroundings, is an expression of kindness with our brothers that we don't know, that are far from our local group, it is

Colombia, Costa Rica, Ecuador, Guatemala y Venezuela

to recognize Subud like a community that it is farder than the one that we live in and we share the interchange is a fundamental element for our grow and where we can develop the happiness of knowing in our differences and coincidencies, to be aware of our concidence in the latihan of Subud. To the point that we are a great family, always to be ready to promote the union of their members, youth and elder, of them that are part of it.
